

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

**LONDON:**

**1893.**

## Preface.

---

ABSTRACTS of the Marriage Allegations from 24th January, 1689, to 12th February, 1693, with one of 23rd June, 1694, are contained in a small quarto Register ; these appear to be only of those Marriage Licences applied for at Winchester, the Surrogates being Isaac Jones, S. Wallace, George Bramston, D. Lee, Jos. Spence, and R. Bowen. No bonds or affidavits now exist for an earlier period or the years 1695-1700 inclusive, after which time there is a bundle varying in size for each succeeding year with the exception of 1712.

Apparently many Surrogates often failed in their duty of sending the Bonds and Allegations to the Registrar, and this for many years running. It appears to have been the custom formerly for blank licences to have been sent to the Surrogates when their previous stock was exhausted.

The parish Church or Churches, in which the ceremony was authorised to be held, were not always given, and a new form of bond was used in 1755 in which they were not named. Later, they were generally given in the affidavits. It will be noted that when only the affidavit is forthcoming, *aff.* in italics shews that the bond is missing ; it may well be that in some cases the applications were not followed up. When the signature differed, as regards spelling, with the name in the body of a document, the name as written in the autograph is given first, with the Surrogate's style following it, as it should be that the applicants knew their own names better than did the Surrogates, who might follow the pronunciation of a name only.

When the contracting parties were of full age, the custom was to insert the words *and above* after the age given ; as a rule, 21 years and above. Thus little dependence can be placed in the stated age.

By the Act 3 George III., chapter 75 (1822), baptismal extracts and affidavits as to age, etc., were required before licences were granted. Apparently, the additional trouble given by recording these particulars, caused the details to be omitted after the new regulations had been observed for a short period, as after 1823 no baptismal certificates were attached to the affidavits.

Bonds for the due performance, etc., of the marriages for which licences were granted, were no longer required after 1822, in accordance, no doubt, with the provisions of the above-mentioned Act, which was passed for the better preventing of clandestine marriages.

Memoranda on the back of some of the bonds shew that £1 3s. 6d. was the cost of a marriage licence in 1742. In 1804, the stamp duty on bonds was increased from fifteen shillings to twenty shillings, and on affidavits from sixpence to eighteenpence. In 1834, the cost of a licence was £3 3s., and if either of the parties were under age, there was an additional charge of five shillings.

The greatest possible brevity has been aimed at in the abstracts, with the view of lessening the labour of reference for the women's and stray names. In all cases where the bondsmen's names agreed with those of the contracting parties these are given. The bonds and affidavits have been compared together in all cases in order that no family details should be omitted. This greatly increased the labour of abstracting the allegations, which are given in these two volumes up to and including the year 1837, amounting to over 25,000, or nearly double that number of loose documents with the accompanying bonds.

For the convenience of those who do not know the names of all the Hampshire parishes, the county is given in which all parishes are situated, which are outside the County of Southampton.

The Allegations for the Surrey portion of the Diocese are under the charge of the Surrey Registrar, Mr. W. P. Moore, and are preserved in St. Saviour's Church. These consist of a book of Allegations running from June 6th, 1674, to February 6th, 1691-2, and of the bonds and affidavits from the year 1730. It is to be hoped that this series will soon be made available for ready reference.

The best thanks of the Society are due to Mr. Charles Wooldridge, the courteous Registrar of the Bishop of Winchester, for the ever ready manner in which the necessary documents, etc., were placed at my disposal, with the permission of the Very Rev. Harold Browne, D.D., the late lamented Bishop of the Diocese of Winchester.

W. J. C. MOENS.

TWEED, LYMINGTON.
